

Forensic Data Analytics

Published on Alvarez & Marsal | Management Consulting | Professional Services

(<https://www.alvarezandmarsal.com>)

A&M's Forensic Data Analytics practice combines unmatched expertise in modern data systems with exceptional quantitative skills and deep knowledge of a broad range of business topics. We merge capabilities traditionally seen in computer forensics, investigations and eDiscovery, with cutting-edge data science and industry-leading business intelligence tools to uncover hidden insights that help our clients make better, more informed decisions.

Our globally integrated team of data experts and industry specialists analyze large volumes of complex data to quickly extract meaningful insights using advanced analytical methodologies. Our data-driven approach mitigates risk and enables our clients to drive business results and rapidly resolve conflicts.

Our Services:

Forensic Data Analytics is an important component in bringing business transparency, conflict resolution and informed decision making to a wide array of matters. Whether proactive compliance monitoring or reactive litigation, investigation or regulatory response, A&M has expertise in key areas, including:

- White collar investigations & litigation
- Regulatory inquiry response
- Government monitorships
- Virtual assets & cryptocurrencies
- Financial reconstruction
- Compliance monitoring
- Lost profits & damages analysis
- Neutral third-party data analysis
- Compliance systems validation
- Trading and financial exchange analysis
- Fraud prevention & detection
